This is a placeholder file.

It exists so that the “CV (PDF)” link on <https://itsjunwei.github.io/> resolves instead of returning 404.

Replace it by overwriting `cv.pdf` in the repository root with your real CV, keeping the same filename, then commit and push. No change to `index.html` is needed.

Until then, the publication list on the site is the current record, and the site itself prints as a CV via Ctrl+P.
